Syllabus
Western Civilization: The Ancient World

This course will provide an overview of Western culture from ancient times. Through an examination of key texts of literature, drama, religion, history and philosophy, it will examine the cultures of Mesopotamia, Israel, Greece, Rome, and the rise of Christianity. We will explore some of the fundamental questions that have confronted human beings since the beginning of time: What is the good life? What is it to be human? What is the value of knowledge? What is the meaning of life? What happens after death? What is justice? What is the best form of government? We will explore how the different cultures had different views of what a human being is and how these views developed over time.
